RIMINI FAIR, OCTOBER 20-22, 2011

TEXTILE ARCHITECTURES/  
TENSILE STRUCTURES  
THE NEW SHOW WITHIN T&T 2011.

From self-supporting gazebos to covers for large surfaces, through temporary and movable curtains, awnings, sail structures, textile covers, and large covers, as well as shadings integrated into the walls of buildings: a professional pipeline including design, light-weight structures, covers, and fabrics used as modular architectural materials will be hosted in one entire hall at **Rimini Fiera**, in natural continuity between the **SUN** exhibition and the more classical **T&T** offering. This new Show will be a true link between visitors at **SUN** (traditionally interested in large covers, bathing establishments, contract, etc.) and operators in the professional sun protection sector of **T&T**.

AT THE SAME TIME
